EDUCATION

The University of Arizona, Tucson, Arizona
B.S. Software Engineering | GPA: 3.837 May 2027
Accelerated M.S. Electrical and Computer Engineering May 2028

WORK EXPERIENCE

Student Worker IT Analyst May 2025 – Present
University Technology and Information Services, Tucson, Arizona

- Provide technical support for staff and Facilities Management personnel across 17+ specialized service groups, troubleshooting hardware, software, account, printer, and endpoint issues through ServiceNow.
- Configure, image, deploy, and troubleshoot Windows laptops and workstations used across university departments, supporting device provisioning and replacement.

PROJECTS

Event Management System January 2026 – May 2026
University of Arizona, Tucson, Arizona

- Built a full-stack event management application using Spring Boot, React, PostgreSQL, JPA, and JWT.
- Developed REST APIs for event creation, registration, authentication, and persistent data management.
- Designed relational PostgreSQL data models and integrated backend services with a React/Vite frontend.

Nutrition Assistant August 2025 – December 2025
University of Arizona, Tucson, Arizona

- Developed a Python and Streamlit nutrition application using a Pandas ETL pipeline to transform CSV datasets and integrated the OpenAI API for agent-based user interaction.
- Deployed MySQL on AWS RDS and queried cloud-hosted nutrition data using SQL.

RESEARCH

Undergraduate Research Assistant January 2026 – Present
University of Arizona, Tucson, Arizona

- Research AI-based time-series forecasting for Digital Twin applications using physical-system data.
- Implement and evaluate Chronos-2 models in Python, using Pandas and NumPy for data processing and forecast analysis.

SKILLS

Technical: Java, Python, C, C++, SQL, TypeScript, Spring Boot, React, Hibernate/JPA, Pandas, NumPy, PostgreSQL, Amazon Aurora, MongoDB, AWS, Git, GitHub, Docker, Jira, ServiceNow, REST APIs
Professional: Agile/Scrum, technical documentation, requirements analysis, project planning, stakeholder communication, troubleshooting, cross-functional collaboration

SENIOR CAPSTONE PROJECT

Team Member September 2026 – Present
Accelerated Computational Physics Algorithms for Optical Simulations Software

- Translate optical simulation and stakeholder requirements into software architecture, implementation tasks, and integration plans as one of two Software Engineering members on a multidisciplinary team, aligning software development with sponsor objectives.
- Own and maintain the team's GitHub repository and Jira project board, establishing Git workflows, Agile sprint planning, task tracking, and documentation to centralize development and coordinate software work across the team.
- Drive project planning and stakeholder coordination by developing Gantt charts, schedules, milestones, and SRD/PDR deliverables, providing the team with a structured roadmap from sponsor requirements through design and implementation.
