https://mariarbravo.github.io

Third-year software engineering student with hands-on IT experience and a strong academic foundation in object-oriented design, digital logic, and data engineering.

EXPERIENCE

University of Arizona, Tucson — *IT Analyst Student Worker*

May 2025 - PRESENT

Provided technical support for hardware, software, and network issues.

Assisted in imaging laptops, managing service tickets, and documenting IT processes.

Collaborated with professional staff to resolve technical issues across multiple departments.

EDUCATION

University of Arizona, Tucson—*B.S. Software Engineering*

Expected Graduation: May 2027

GPA: 3.825

PROJECTS

Interactive Nutrition Assistant

Built an ETL pipeline in Python to retrieve, clean, and integrate nutrition, food price, and portion datasets. Used Pandas, NumPy, and AWS for data storage and processing. Also, integrated the OpenAI API to generate AI-driven nutrition insights. Applied data cleaning, transformation, and aggregation techniques.

Social Network Graph Analyzer

Built a C++ program that models a social network with graphs, identifies the most influential user, and displays nearby account connections using object-oriented design and STL data structures.

Online Resume

Built a personal portfolio website from scratch using HTML, CSS, and JavaScript. Developed responsive layouts with interactive project displays. Deployed on GitHub Pages.

Game of Trains

Developed a C program simulating a multi-player card game with custom decks and strategic player actions. Implemented arrays, dynamic memory, shuffling, dealing, and sorting algorithms to manage gameplay logic and card interactions.

Software requirements Specifications document

Collaborated with a team to develop a comprehensive SRS document using Enterprise Architect, modeling functional and non-functional requirements. Incorporated UML diagrams and technical documentation. Recognized with first-place distinction in the course for best SRS.

SKILLS

Programming Languages: C, C++, Python, Verilog, HTML, CSS, JavaScript

Tools & Libraries: Pandas, NumPy, Enterprise Architect, Git/GitHub, VS Code, Vivado, Jupyter Notebook, FPGA

Frameworks & Deployment: AWS RDS, Streamlit, GitHub Pages

Concepts: ETL Pipelines, SQL, Debugging

AWARDS

Academic Year Academic Distinction - 2024

Dean's List with Distinction - Full Time - 2024

Global Wildcat Award - 2023

LANGUAGES

English - Fluent

Spanish - Fluent
